BigRep SE celebrates stock market debut on the Frankfurt Stock Exchange

Frankfurt, 31 July 2024 - BigRep SE ("Company" or "BigRep"), a manufacturer of large-format 3D printers specialising in Additive Manufacturing ("AM"), resulting from the business combination of BigRep GmbH and SMG Technology Acceleration SE, today celebrated a successful stock market debut on the regulated market of the Frankfurt Stock Exchange (General Standard). The initial share price was EUR 11,20. BigRep's shares have the International Securities Identification Number (ISIN) LU2859870326, the German Securities Code (*Wertpapierkennnummer* - WKN) A40H84 and the ticker symbol B1GR.

Established in 2014, BigRep delivers additive manufacturing solutions consisting of reliable hardware engineered in Germany as well as intelligent software for productivity and ease of use. BigRep gives its customers the freedom to use BigRep's own quality-tested materials, as well as filaments from third-party suppliers. The offering is completed by extensive value-adding services. These include print services from BigRep 3D Partlab, application engineering and consulting, training and eLearning through the BigRep ACADEMY, as well as installation and maintenance. BigRep aims to ensure rapid customer success before and after purchase, even for less experienced users. Today, customers include blue-chip companies such as Ford, Deutsche Bahn, Canyon and Airbus, as well as "hidden champions" such as Zoeller and Magirus, but also educational institutions, research institutes and innovative start-ups.

"With our holistic approach, we at BigRep offer far more than just an industrial 3D printer. Thanks to our four-pillar business model based on hardware, software, materials, and services we have been able to rapidly expand our business in recent years. Together with our first acquisition HAGE3D, more than 1,000 large-format AM systems have now been installed at a wide range of customers from various sectors, particularly the automotive, aerospace and manufacturing industries. Our revenue development has also been correspondingly positive, with an average annual growth rate of around 22% between 2021 and 2023. Now we want to continue our success story and our buy-and-build strategy at BigRep as a listed company," reflects Dr.-Ing. Sven Thate, CEO of BigRep.

In addition to its organic growth plans, BigRep is focused on expansion through acquisitions in a highly fragmented market with clear investment criteria in terms of region, technology, and profitable growth path. This approach enables BigRep to efficiently incorporate synergetic companies and technologies into its own range of services and integrate them into the global structures for sales and marketing, as well as service and supply chain. The most recent example of the buy-and-build strategy is the acquisition of the Austrian company HAGE3D GmbH, which has a strong local presence in Germany and Austria and a complementary product portfolio for large-format FFF systems in the medium and high-temperature range. BigRep intends to leverage the established supply chain, global set-up, and partner network to scale HAGE3D's business and further increase the customer value of the new high

temperature systems through its software, material, and service solutions. The VIIO-250 developed by BigRep for the low to medium temperature range was recently presented globally in Los Angeles at the leading AM trade fair Rapid+TCT alongside the ALTRA-280, a high-temperature product developed by HAGE3D.
